

LS Command Quick Reference

Option	What It Does
ls	Lists files and folders in the current directory.
-a	Shows hidden files (those starting with a dot .).
-l	Displays detailed information (permissions, size, owner, date).
-h	Makes file sizes easier to read (KB, MB, GB).
-t	Sorts files by modification time (newest first).
-r	Reverses the sort order.
-R	Lists files in the current directory and all subdirectories.
-F	Adds symbols to file names (/ for folders, * for executables, @ for links).
-alh	Combines options: hidden files, detailed info, human-readable sizes.
